Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34, 44-49, drawn to a bifurcated stent, classified in class 623, subclass 1.35.
 - II. Claims 35-43, drawn to method for facilitating retrograde supply of oxygenate blood from a left ventricle to heart tissue via a coronary sinus, classified in class 623, subclass 1.35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used with a different process for example the method of treating a bifurcated section in vascular system of a patient.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Yim on 4/27/04 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-34, 44-49. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 3731

Claims 35-43 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Information Disclosure Statement

5. The information disclosure statement (IDS) submitted on 01/07/2002 is acknowledged and considered.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-34 and 44-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Martin (5,653,743) see figure 1 and col. 2, line 49 to col. 3, line 39. Note: The introductory statement of intended use and all other functional statements have been carefully considered but are deemed not to impose any structural limitations on the claims distinguishable over the Martin's device which is capable of being used as claimed if one desires to do so.

Conclusion

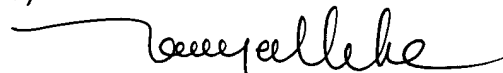

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin (6,562,066) discloses a stent for arterialization of the coronary sinus and retrograde perfusion of the myocardium and Frid (6,149,682) discloses a bifurcated stent-graft.
